PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4 years of experience developing web applications, REST APIs, internal tools, and AI-powered automation systems. Strong hands-on experience with React.js, Node.js, ASP.NET Core, SQL Server, MongoDB, JavaScript, Python, Docker, GitHub Actions, and AWS. Experienced in API development, database optimization, CI/CD support, production debugging, role-based access control, WhatsApp Business API integrations, and Agile software delivery.

SKILLS

Languages: JavaScript, TypeScript, Python, C#, Java, SQL, C++

Frontend / Mobile: React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Vite, Android Development

Backend: Node.js, Express.js, ASP.NET Core, RESTful APIs, GraphQL, Microservices, Authentication, Authorization

AI / GenAI: OpenAI API, LangChain, RAG Pipelines, Prompt Engineering, Semantic Search, Vector Databases, AI Workflow Automation

Database / Storage: MongoDB, SQL Server, PostgreSQL, MySQL, Firebase, Query Optimization

Cloud / DevOps: Docker, Kubernetes, GitHub Actions, AWS, Azure, Terraform, CI/CD, Linux

Engineering Practices: Agile, Scrum, Code Reviews, Testing, Debugging, Performance Optimization, Product Engineering

WORK EXPERIENCE

Software Developer | Full-Stack and AI Solutions
NIIT Ltd

Sep 2022 – Present
Gurugram, India

- Delivered 12+ enterprise modules using ASP.NET Core, React.js, Node.js, MongoDB, and SQL Server for business applications.
- Created RESTful services for authentication, reporting, data processing, Excel imports, and role-based access across 8+ modules.
- Improved API response time by 35% through SQL indexing, query tuning, payload optimization, and service-layer refactoring.
- Added OpenAI API and LangChain capabilities for contextual search, content assistance, and faster knowledge access.
- Automated Excel upload and export operations, lowering manual data handling effort by 40% for business and operations teams.
- Secured application modules using JWT authentication, role-based permissions, protected routes, and input validation.
- Cut production defects by 25% through regression testing, debugging, release validation, and root cause analysis.
- Maintained Docker and GitHub Actions CI/CD pipelines, decreasing manual deployment tasks by 30%.
- Worked with product, QA, and operations teams during sprint planning, requirement analysis, UAT, and release cycles.
- Reviewed code and mentored junior developers on service design, debugging, clean coding practices, and delivery quality.

PROJECTS

Toni and Guy Patna | Salon Website, Booking Platform and WhatsApp AI Automation

May 2026 – Present

<https://www.toniandguypatna.com/>

React.js, React Router, Tailwind CSS, JavaScript, WhatsApp Business API, OpenAI API, Responsive UI

- Built a premium salon website for Toni and Guy Patna with responsive pages for home, services, and appointment booking.
- Planned a simple booking flow where users can select services, check pricing, and reserve appointments through a clean interface.
- Structured service categories for hair styling, treatments, chemical services, hair color, nail art, facials, waxing, spa, and hand and foot care.
- Integrated AI-powered WhatsApp automation using OpenAI API to handle customer inquiries and appointment queries during non-business hours and non-working days without manual intervention.
- Improved the user experience with a luxury dark theme, clear navigation, action buttons, and a mobile-friendly layout.

QuizForge | AI-Powered Quiz Platform with Role-Based Dashboards

May 2026 – Present

<https://quizforge-ashy.vercel.app/>

Next.js, React.js, TypeScript, Prisma, PostgreSQL, Authentication, REST APIs, Vercel

- Built a role-based quiz platform with secure login, registration, and dashboards for admin, mentor, and student users.
- Implemented authentication workflows using protected routes, Prisma models, and PostgreSQL-based role management.
- Developed dashboard views to track quizzes, students, attempts, and AI-powered learning feedback in one place.
- Deployed the application on Vercel with production environment variables, database connectivity, and cloud configuration.

Expert Computer Academy | Full-Stack LMS Platform and WhatsApp AI Bot

Dec 2025 – Present

<https://www.expertcomputeracademy.in/>

React.js, Node.js, MongoDB, Docker, RESTful APIs, GitHub Actions, WhatsApp Business API, OpenAI API

- Launched a production-ready LMS platform for student management, fee processing, batch allocation, and admin operations.
- Designed 15+ REST endpoints and MongoDB models for student, admin, fee, course, lecture, and batch management modules.
- Built an AI-powered WhatsApp bot using OpenAI API to automatically respond to student and parent inquiries about admissions, fees, and schedules during non-business hours and non-working days.
- Reduced page load time by 28% by optimizing React rendering, routing structure, reusable components, and dashboard layouts.
- Configured Docker and GitHub Actions pipelines to improve release consistency and reduce manual deployment effort.
- Organized records for students, fees, batches, lectures, and reports, improving operational tracking for academy staff.

- Reduced manual profile review time by 60% by automating repository scanning, data extraction, and summary generation.
- Created a GitHub profile review platform that evaluates code structure, project quality, and technical strengths.
- Implemented embedding-based search using LangChain, Pinecone, and similarity matching for repository insights.
- Designed prompts to extract project details, technology usage, improvement areas, and developer readiness signals.

ACHIEVEMENTS

- Recognized at NIIT Ltd for improving backend processing performance by 25% across production application flows.
- Delivered production-ready full-stack and automation features supporting internal users, reporting teams, and business operations.
- Improved information retrieval efficiency by adding AI-assisted search and structured data processing methods.
- Guided junior engineers through 20+ debugging sessions, implementation reviews, and API development discussions.
- Participated in UDAAN – Let Dreams Fly, a 7km fundraising marathon organized by RAIT Social Wing. March 2020

PUBLICATIONS

- **High-Accuracy Text Extraction Using OpenCV and Tesseract OCR** – Achieved 98% OCR extraction accuracy across 500+ structured image datasets using Python, OpenCV, and computer vision techniques.

CERTIFICATIONS

- Python Programming Certification – Learnbay 2026
- Generative AI Certification – Learnbay In Progress
- Programming in Java – NIIT November 2021
- Developing Mobile Apps for the Android Platform – NIIT June 2020
- Data Structures and Algorithms – NIIT March 2020
- Object-Oriented Programming Using C++ – NIIT July 2018

EDUCATION

Bachelor of Engineering in Computer Engineering

Ramrao Adik Institute of Technology, Mumbai University

Aug 2018 – May 2022
CGPA: 7.30/10
